

Board of Environmental, Health & Safety Auditor Certifications

Providing accredited certification to EHS auditing professionals as a Certified Professional Environmental Auditor (CPEA). The BEAC CPEA has been granted full accreditation by the Council on Engineering and Scientific Specialty Boards (CESB).

What is BEAC?

- Created in 1997 as a joint venture between The Institute of Internal Auditors and the Auditing Roundtable. Together, The IIA and the Auditing Roundtable represent in excess of 100,000 members worldwide.
- BEAC is an independent, nonprofit professional certification board – we are not a membership organization.

BEAC's Mission

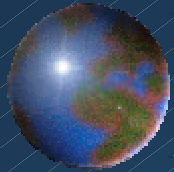

- **Issue certifications** relating to the professional competencies in the field of environmental, health and safety auditing.
- **Promote high levels of professional competence** among environmental, health, and safety auditors.
- **Promote high ethical standards** in the practice and profession of the environmental, health, and safety auditing.

Code / Conduct / Guidance

BEAC has established and documented the following to promote high standards for EHS Auditors:

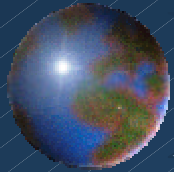

- *Code of Ethics*
- *Standards of Conduct*
- *Standards for the Professional Practice of Environmental, Health, & Safety Auditing*
- *Competency Framework for Environmental, Health & Safety Auditors*

Certification Programs

BEAC currently offers the CPEA designation in the following:

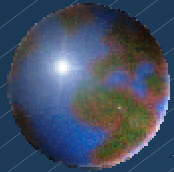

- Environmental Compliance
- Health & Safety
- Management System
- Responsible Care®

The Latest Numbers

As of September 15, 2005:

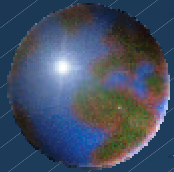

- 1,377 individuals are CPEAs or are applicants
- BEAC CPEAs and applicants represent over 600 different companies, 21 countries, 48 US states and Puerto Rico
- **EMS-14000 Plus (no longer offered):** 172 CPEAs, 14 applicants
- **Environmental Compliance:** 517 CPEAs, 76 applicants
- **Health & Safety:** 790 CPEAs, 26 applicants
- **Management System:** 34 CPEAs, 18 applicants
- **Responsible Care®:** 14 CPEAs, 44 applicants
- An applicant may become certified in one or more programs

Qualification Criteria

- Education (Bachelor's degree or higher)
- Professional Experience
 - ✓ 4 years of relevant work experience
 - ✓ 20 audits/100 audit days/20 audit days on-site over past 4 years
- Auditor Training (40 hours within 3 years of application)
- Two Character References
- Passing a Certification Examination

NOTE: The Responsible Care® Auditor Certification requires additional criteria as established by the American Chemistry Council.

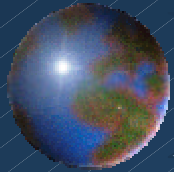

Continuing Professional Development

BEAC applicants and CPEAs must maintain competence by ensuring current knowledge of:

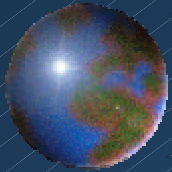

- *Aspects of relevant science*
- *Appropriate aspects of facility operations*
- *Relevant requirements of EHS laws, regulations, and related documents*
- *EMS and related standards*
- *Audit procedures, processes and techniques*

Every two years, BEAC CPEAs are required to submit objective evidence of 40 hours of continuing professional development.

Benefits of Using Certified Auditors

- Verification of experience, education, and technical proficiency.
- Confirmation of professional preparation and commitment to professional excellence.
- Publicly recognized common practices and standards applicable to the profession.
